

Chair Covers

You can quickly make your wedding and reception burst with vibrant colour and style by covering the venues current chairs with affordable wedding chair covers - chair covers make a room. Any occasion in any setting can be changed by covering the chairs. They will create an elegant atmosphere with linen that everyone will remember for years to come. Adding chair covers to complement or contrast the linen chosen for an event will totally transform the look of the event.

Many websites show a before and after web page that shows the difference between a hall prior to a chair cover set up and after. This is a useful tool when selling the concept to a potential customer.

Different Style Chairs:

Unfortunately there is no one-chair cover-fits-all cover and anyone that offers this is not fully equipped to be offering chair covers. Below is a description of the most common chairs and the sizes that Northfields offers for this:

SIZE GL

This chair is a standard wooden banqueting chair known as the Cheltenham or Bentwood Design in natural wood.

The seat pad is removable. This banquet chair is very popular amongst equipment hire companies as it is stackable and thus easily transportable. (www.a-e-f.co.uk/Cheltenham-Natural-Bentwood-Chair). This chair comes in various colours, the most popular being Gold, White and Silver (www.spaceworks.co.uk/products/Chairs_and_Seating/Banqueting/59/)

We call this size GL and this is available in most colours and fabric types. We also offer seat pads (sometimes called chair pads or shower caps) for those that just wish to coordinate the seat to the theme of the event.

DIMENSIONS

Height: 87cm/32.5"

Width: 40cm/15.7"

Seat depth: 40cm/15.7"

In order not to mix this chair up with other chairs that are similar, the inside of this chair is sewn with **red** thread thus making it easily identifiable to the laundry which size this is.

SIZE L

This chair is a metal frame chair that is used by some equipment hire companies as it too stacks. Both the back and seat of the chair are upholstered and do not have a detachable pad as does the gilt chair. Some hotels have chairs in this mould too, though increasingly hotels are moving to the larger chair (see GM) as this chair is less versatile. When a venue has this chair the next size up is also usable though size L is a better fit

DIMENSIONS

Height: 95cm/37.5"

Width: 43cm/17"

Seat depth: 38cm/15"

In order not to mix this chair up with other chairs that are similar, the inside of this chair is sewn with **royal blue** thread thus making it easily identifiable to the laundry which size this is.

SIZE GM

This chair has many different variants and styles, though the common theme is that they are fairly large. Hotels or fixed sites i.e. venues that have on site banqueting and therefore do not need to move their equipment around generally use this style chair. One of the largest manufacturers of this chair is Burgess Furniture (www.burgessfurniture.com)

DIMENSIONS

Height: 93cm

Width: 50cm

Seat depth: 41cm

In order not to mix this chair up with other chairs that are similar, the inside of this chair is sewn with a **green** thread thus making it easily identifiable to the laundry which size this is.

GM = Large Metal

L = Medium

GL = Small Wooden (Gilt/Camelot/Chiavari/Cheltenham/Bentwood)

GM = Large

BOWS

Our chair bows are manufactured in house. The size that we use is 254cm (100") x 10cm (25.4"). Chair bows are available in most of our ranges though as a rule, organza is the most popular and one used by most competitors. Generally people tie the chair bows as a bow but they can be tied around loosely without making them into a bow.
